

# Wahl-Eversharp Policy and Guarantee

**I**N presenting to WAHL-EVERSHARP Dealers, our new and most complete number 298 general catalog, we extend to you an invitation to visit in pictures the great WAHL-EVERSHARP plant and view the quality products that you as dealers have played so important a part in making possible.

In return for the faith our dealers have manifested in WAHL-EVERSHARP merchandise over the past decade, we pledge a continuance of those principles of fair dealing that have contributed to the success of WAHL-EVERSHARP Dealers throughout the civilized world. With this pledge we give to you the benefit of The Wahl Company's vast manufacturing facilities, experimental laboratories directed by master craftsmen, where, for years, those developments that have molded the destinies of the industry were originated. It is because of these facilities that we are able to present to you for the first time in the history of writing instrument manufacture, The WAHL-EVERSHARP *Personal-Point Fountain Pen* with the Interchangeable Nib.

Uppermost in our minds is the desire to produce and sell the highest type merchandise possible for human ingenuity and modern machinery to develop and manufacture. Realizing that the dealer must sell our products before they are a success, we have kept in mind only those improvements and changes that mean quicker turnover, least inventory and greater profits for you. The *Personal-Point Pen* further emphasizes this policy.

A word about Guarantee . . . A Guarantee that works no hardship on the dealer and at the same time adds to the convenience of the consumer is in our minds, consistent with twentieth century merchandising methods. The Wahl Company Guarantee is virtually unconditional, yet plainly stated in a way that is sure to be understood by both dealer and consumer.

The Guarantee insures satisfied customers for the dealer made up of a consuming public who have made WAHL-EVERSHARP the standard of comparison for EIGHTEEN years.

## The Guarantee

*WE, THE WAHL COMPANY, hereby guarantee all Wahl-Eversharp pens and pencils against defects in material and workmanship. If at any time any part of, or material in any pen or pencil, proves defective, send it to our factory, postage prepaid, and enclose ten cents for each item to cover postage and insurance for its return. No charge will be made for repairs due to defects.*

## The Home of Wahl-Eversharp

*Seven acres of floor space devoted to manufacturing Wahl-Eversharp Products*

**H**ERE is the first stop on our picture tour of the WAHL-EVERSHARP plant. A complete manufacturing plant—fireproof, of brick, stone and concrete construction—five full floors contain seven acres of floor space. Four floors are given to manufacturing, the fifth houses the executive, sales, product development and general offices.

**P**ACE will permit only a few brief words of explanation as we pass from one department to another—Gold points are alloyed from pure gold, tipped with iridium, ground to jeweler's precision and fitted into pen barrels of every color, style and size required by an exacting public. Permanency must be the keynote of fountain pen value, so Rubber, Gold, Silver and Pyralin are used for beauty, strength and lightness.

In the Pencil Department we see the famous "EVERSHARP" assembled step by step under the watchful eyes of a score of critical inspectors. Because all parts are interchangeable, each one must be perfect. "EVERSHARP," the first mechanical pencil to use thin lead, long ago established a standard of mechanical pencil manufacture.

No pencil would be complete without perfect lead—EVERSHARP Red Top Lead has gained world-wide recognition because of these exacting requirements that make diameter variations less than 1/1000th of an inch.

The wide distribution of EVERSHARP Leads makes the sale of all other mechanical pencils possible and their use in other pencils makes them write better. The three lead diameters now commonly called "Standard" were established by WAHL-EVERSHARP and because they were adopted by all, they soon became "Standard."

*First*—The .046 lead made a mechanical pencil possible. EVERSHARP originated this size and its practical-

bility is determined by the fact that it is used today in all mechanical pencils.

*Second*—The .075 lead is commonly called "thick writing lead" and is designed for those who prefer a lead that can be used for checking and manifolding purposes as well as for general writing.

*Third*—The .120 checking lead has a very definite place in the pencil field. This lead is sometimes known as "Executive" lead, it being especially adapted to checking work and where heavy marking is necessary.

Thus it is that no pencil could be a success were it not for EVERSHARP Red Top leads. They are the standard by which all pencils are sold today.

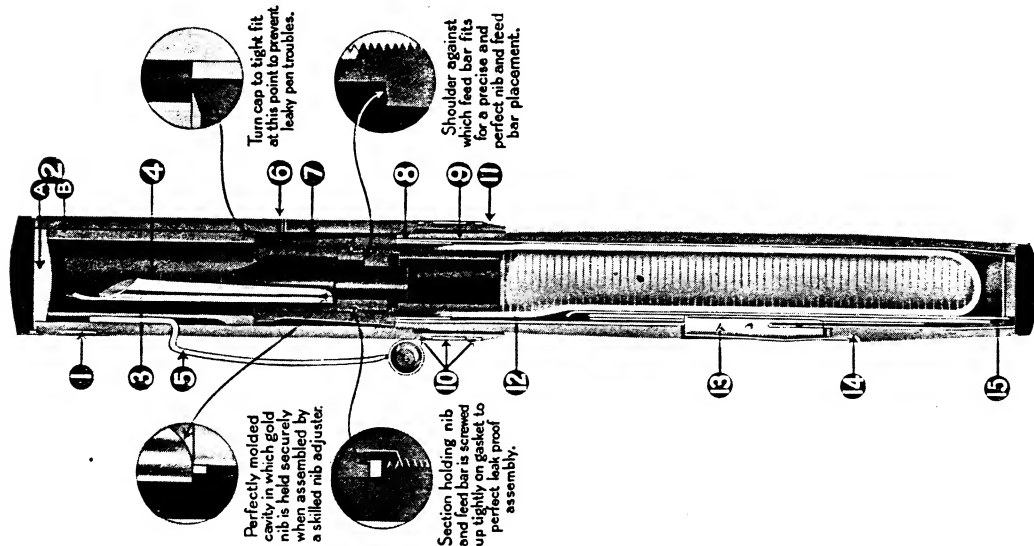

Last, but by no means least, we come to the Fountain Pen Desk Set Department, where a product of rare beauty and unexcelled utility holds forth. The most remote parts of the earth are searched for materials for desk set bases—Green Onyx from Argentine, Pedrara Onyx from Mexico, and Italy furnishes Portoro (Black and Gold) Marble. In addition to these are Black Carrara Glass, Genuine Bronze and Rare Wood, on which are carved designs created by the masters.

Thus we approach the display rooms in the pages of this catalog, where we get a "close-up" of each item. They must stand on their merits before you, our dealers, to whom our offering is respectfully submitted.

# Superior Features of Personal-Point Pens

- (1) "Gold Seal"—the mark of a WAHL-EVERSHARP perfect pen with the Interchangeable Nib Unit.
- (2) Soft rubber pad (A) compressed by inner cap walls.
- (3) When cap is turned on tightly and firmly, it remains a tight leak-proof fit because the specially ground knife edge shoulder prevents ink or other substances from interfering.
- (4) Sturdy 14K Gold Nib.
- (5) WAHL comb feed controls flow evenly to the last drop.
- (6) Exclusive roller clip holds pen securely in place, yet does not tear or otherwise wear the pocket.
- (7) Cap air vent prevents condensation on pen section and avoids soiling fingers when writing.
- (8) Shapely section most comfortable to finger grip.
- (9) Metal collar for easy placement of section into barrel for "sac" renewals.
- (10) Metal insert strengthens all barrels—lightest weight.
- (11) Unique gold-filled bandings strengthen and beautify pen cap.
- (12) Beautifully shaped and fitted terminal of cap.
- (13) Strong, heaviest wall rubber ink sac. Will not twist.
- (14) 100% efficient filling lever assembly.
- (15) Thumb slot for easy access to lever filler.
- (16) Lever lock holds filling pressure bar in place within barrel. Bar cannot release and fall out of barrel.

SHOWN here are just a few of the exclusive features of the WAHL-EVERSHARP Personal-Point Fountain Pen. The Interchangeable nib feature, the result of years of careful study and experimental development, is one of the most important engineering changes made in a fountain pen since the introduction of the self-filler.

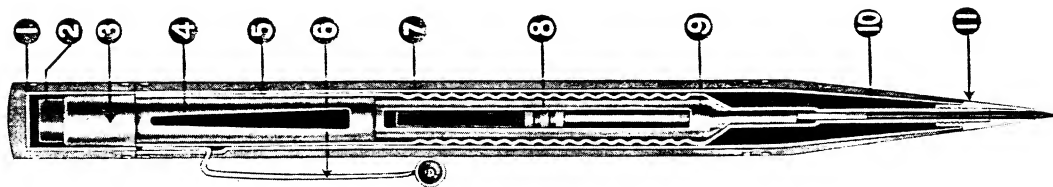

All WAHL-EVERSHARP Pens shown in this catalog having either No. 4 or No. 6 Gold Seal nibs are fitted with the Interchangeable nib feature and are Personal-Point Pens.

The customer selects the holder according to size, style and color. Then he selects the point that fits his personal writing style.

The two are instantly joined by the dealer and the customer goes away happy with his Personal-Point Pen.

# Superior Features of Wahl-Eversharp Pencils

- (1) Metal insert of cap strengthens cap and assures smooth fit.
- (2) Eraser renewable. Cannot come out in use, but is easily removed for re-placement.
- (3) Sturdy eraser shell smooth for cap fit.
- (4) Side opened lead magazine permits lead to tilt out without entirely re-moving cap piece.
- (5) Metal insert for lightest weight and strongest barrels.
- (6) Spring clip of special design.
- (7) Rolled thread tube for smoothest travel of mechanism.
- (8) Strong and smooth cross head to propel mechanism and lead.
- (9) Housing of device permits "quick release" and withdrawal of the mechanism for reloading when new lead is needed. EVERSHARP is the fastest loading pencil—it requires only a few seconds.
- (10) Perfect alignment of lead in feed tube extending to hardened steel rifled tip.
- (11) WAHL-EVERSHARP patented rifled tip holds lead firmly, protects from breaking and prevents lead turning.

**E**VERSHARP is the best known pencil today because it was EVERSHARP that made the mechanical pencil possible through its adoption of certain standard diameters for the leads used in those pencils. EVERSHARP was the first mechanical pencil to use thin lead, which is now standard in all pencils.

EVERSHARP—the mechanical features of which are shown on this page—has certain fundamental advantages for the user that are not found in other pencils. The rifled tip (patented) affords tiny relief space between the lead-gripping teeth, to prevent clogging or jamming. Still the lead is held firmly at the point—no slipping—no wobbling. The genuine EVERSHARP can be identified by the grooves cut in the lead as it passes through the tip.

EVERSHARP loads in an instant. The automatic trigger release makes this possible. One pull—insert lead. One push—a turn—that's all. Extra leads are accessible immediately through the side opening in the lead magazine. The exact amount of lead in the pencil can be determined by simply pulling the cap out.

# WAHL-EVERSHARP *Personal-Point* FOUNTAIN PENS

## The Gold Seal Line

**I**T IS a source of pleasure and gratification for us to offer our dealers, in this catalog, the WAHL-EVERSHARP line of *Personal-Point Fountain Pens*, identified by the Gold Seal of quality and incorporating what is undoubtedly the greatest improvement ever made in a fountain pen—the Interchangeable Nib.

Never before has it been possible for all dealers to carry sufficient stock to offer their customers exactly the points they desire, in the great variety of styles, colors, and sizes of holders.

The introduction of the Interchangeable Nib does not affect any sale that can be made without it. The advantages are paramount when the customer is pleased with the size, style and color of one pen, but prefers the point in some other. In cases like this, the sale would be lost were it not possible for the sales person to make the change. Only one minute is required to make a custom-built pen for the customer.

The Gold Seal line is complete in every detail, yet it is possible for the dealer to carry only one-fourteenth as much stock to make an equal number of sales as he could with any other line.

All No. 4 and No. 6 WAHL-EVERSHARP Pens priced at \$5.00 and up are fitted with the Interchangeable Nib Unit, identified by the Gold Seal of quality. All No. 4 and No. 6 Desk Pens have the Interchangeable Nib feature and *points in desk pens are interchangeable with those in pocket pens* as well.

The *Personal-Point Pen* offers a number of exclusive advantages:

1. Greater Consumer Appeal—"A Personally Selected Point."
2. Exclusive Sales Feature.
3. Smaller Investment.
4. Faster Turnover.
5. More Variety—It tempts more buyers.
6. Highest Profit Per Square Foot of Counter Space.
7. Assured Profit—No "dead" stock.
8. Complete stock in smallest space.
9. Easier Sales.
10. Highest average unit price.
11. Only WAHL-EVERSHARP Dealers "get it."

"A Mile Wide and A Foot Deep" characterizes your stock of WAHL-EVERSHARP *Personal-Point Pens*. "A mile wide" because of the great variety offered by four styles, six colors and fourteen points—each instantly interchangeable. Such a variety tempts more customers—thus giving them the urge to buy.

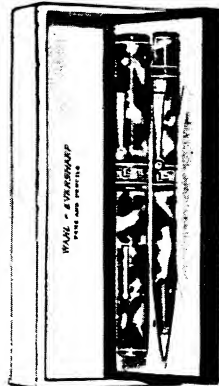

"A foot deep" because with a limited stock of *Personal-Point Pens*, you can make every sale. The inventory value of your stock is at a minimum.

WAHL-EVERSHARP  
*Personal-Point*  
FOUNTAIN PENS

WAHL-EVERSHARP *Personal-Point Pens*, identified by the Gold Seal of quality, are the standards of comparison. The roller clip is an exclusive feature—all mountings are gold-filled. The distinctive engraved banding design is a product of master designers. Pens are fitted with Gold Seal No. 6 Interchangeable nibs in a choice of fourteen points. The Interchangeable nib feature makes it possible for the customer to select from fourteen nibs and six different colors.

**WAHL - EVERSARP**

FOR Milady's purse, these EVERSARP Pencils in colors to match the pens on the opposite page are the last word in attractiveness. Fitted with ring caps and gold-filled bands except Bronze-Green as illustrated. The concealed eraser and extra supply of leads in the lead magazine add to the utility of these pencils for the business or professional woman. The ideal pencil for marking the bridge score. These pencils have the same mechanisms that have made EVERSARP the standard of comparison the world over. It's the fastest loading pencil.

# Wahl-Eversharp

**E**QUI-POISED *Pens and Pencils* characterize the "ultra-modern" in writing instrument design. These *Personal-Point Pens* with the Interchangeable Nib feature are the *last word in style*; designed to fill a twentieth century public demand. The *Equi-Poised* pen is the only pen of this style that can be selected for color and at the same time be fitted with the EVERSARP Interchangeable Nib. A point for any hand—fitted instantly to any holder.

Added to the distinct style of the *Equi-Poised Personal-Point Pen*, is the unusual choice of colors. Bronze-Green (a WAHL-EVERSARP creation) has already won the stamp of public approval. In addition, these popular numbers can be had in Black and Pearl, Jade Green, and Jet Black. All of these materials are *Pyralin*—practically indestructible.

The EVERSARPS to match these pens need no introduction. Years of successful performance for the writing world has made it possible for us to offer this unusual line of pencils as companions for the pens justly called "*Equi-Poised*" (equally balanced).

WAHL-EVERSHARP  
*Personal-Point*  
 FOUNTAIN PENS

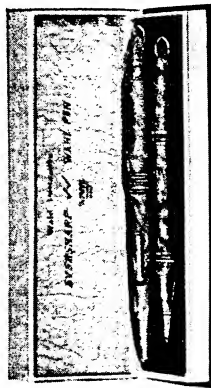

WAHL-EVERSHARP *Equi-Poised Personal-Point Fountain Pens* are supplied in four popular colors—Black and Pearl, Bronze-Green, Jet Black, and Jade Green. Shown on this page are those numbers having greatest feminine appeal. Cap ring, bands, and filling lever are gold-filled. Pens are fitted with No. 4 Gold Seal nibs. These *Equi-Poised, Personal-Point Pens* are indeed Personal writing tools because in addition to their unusual beauty the Interchangeable nib is an added feature. Point and holder can be selected separately.

WAHL-EVERSHARP  
*Personal-Point*  
 FOUNTAIN PENS

WHAT man would not be proud to have one of these *Equi-Pointed Personal-Point Pens* nestling in his vest pocket? A color personally chosen—a point selected to fit his individual hand is permanently jointed for him at your own pen counter. Men who demand "writing ease" will select the *Equi-Pointed Pen*, not merely because of the equal balance for writing, but because they can choose the particular point best suited to the hand.

All mountings are gold-filled, with the exclusive roller clip and fitted with No. 4 Gold Seal Interchangeable nibs. They may be carried in the coat or vest pocket, or used as a desk pen in the regular WAHL-EVERSHARP Humidor.

# Wahl-Eversharp Fountain Pen Desk Sets

**M**ODERN business as well as modern homes demand the best in desk writing equipment. WAHL-EVERSHARP *Fountain Pen Desk Sets* are designed to meet every desk need. Beauty and utility have been combined to make these sets the leaders in the field.

To meet the demands of today, writing equipment for the desk must embody certain mechanical features necessary for complete efficiency. WAHL-EVERSHARP *Desk Sets* meet every requirement.

Foremost among these, is the ball and socket joint, permitting the desk pen to stand in any position desired by the user. If desired, the pens may be placed at an angle of 10 degrees—low enough for the set to be placed in a desk drawer.

The desk set supplies a long felt want in both office and home. Its true worth is determined by the Humidor receptacle in which the desk pen rests. It must be so constructed that a circulation of air at the right point prevents accumulation of moisture on the pen section. This feature assures the user a moist nib at all times, with no ink on the fingers when writing. The Humidor of the WAHL-EVERSHARP *Desk Set* holds the pen in a practically air-tight space, thus preventing any vacuum formation. This feature accounts for the constant satisfaction assured the user of a WAHL-EVERSHARP *Fountain Pen Desk Set*.

The pens, too, must be properly balanced to prevent fatigue during long hours of writing. WAHL-EVERSHARP *Desk Pens* are built for exclusive desk use. The entire quill is tapered for the perfect balance that is not found when regular pocket pens are used for desk pens. The better sets in the WAHL-EVERSHARP

line are fitted with *Personal-Point Pens*, with the Interchangeable Nib feature. This assures the user the same personally selected point that is possible with a WAHL-EVERSHARP pocket pen.

At least a part of the world-wide popularity of WAHL-EVERSHARP *Fountain Pen Desk Sets* can be attributed to the very unusual materials used in making the bases. No expense is spared in bringing the choicest Onyx and Marble from the most remote corners of the Universe.

Onyx is perhaps one of the oldest of stones, its origin having been traced back to King Solomon's temple. Only a few Onyx quarries are known to the world—less than six producing in merchantable sizes and quantities. The largest and best known of these quarries is in lower California, about three hundred miles south of San Diego and fifty-five miles inland. This desolate stretch of desert, a spot almost forgotten by man, is thus producing one of the most beautiful and valuable of commercial stones.

To insure perfect bases for WAHL-EVERSHARP *Desk Sets*, our selections are made from blocks from three to six feet thick, twenty-four to forty-two inches wide, and ten to twelve feet long. This careful selection eliminates the "quarry run" and insures our getting only the very best stone for all our bases. It has been learned from eminent authorities that in the color formation of Pedrara Onyx, next in importance to lime is iron. This mineral in different states of combination, together with manganese (a brittle metal similar to iron, having a grayish white color tinged with red) cause the color variation. The beautiful banding or waving lines is a peculiar feature of this material.
